

MATH & MANDARIN WITH LITING

ENROLLMENT OPEN

Summer *Intensive* Program

2026

June 16 — August 6
Tue - Fri · 4 sessions / week

A student who memorizes a method has rented it. A student who understands the structure owns it — and owns every method that follows from it.

GRADE LEVELS

4-5

ELEMENTARY

The Golden Window

Before bad habits form, we build mathematical language and structural thinking from the ground up.

FOUNDATION → OWNERSHIP

6-8

MIDDLE SCHOOL

Close the Gap Before It Widens

The divergence point. We identify the 2-3 concept gaps quietly growing and eliminate them before high school accelerates.

DIAGNOSIS → REPAIR

9-12

HIGH SCHOOL

Results, Not Effort

AP, honors, GPA. We target exactly what matters and measure visible progress every session.

AP · HONORS · GPA

Uni

COLLEGE

High-Speed Foundation Repair

Calc I-II, linear algebra, statistics. For students who hit a wall — we rebuild the foundation at adult pace.

CALCULUS · STATS · LINEAR ALGEBRA

EVERY STUDENT GETS

01

Diagnostic Assessment

Before the first session, I find exactly where the gaps are. No guessing.

02

Customized Curriculum

Built around your child's specific gaps — not a generic summer packet.

03 Parent Progress Updates
After each session you know exactly where your child is and what changed.

04 8 Years of Experience
K-12 and college. 1-on-1, small group, large class. I've seen this before.

WHAT I BELIEVE

- *I teach the shape of thinking, not the answer to the problem.*
- *"My child worked hard" is not a result. Progress is the result.*
- *You are purchasing visible progress — not faith in my judgment.*
- *Summer is not a break. It is the only window before the pace becomes unforgiving.*

Ready to give your child a *real* head start?

Spots are limited. A 15-minute call is all it takes to know if this is the right fit.
